

History of Events in Sirohi
By Shomit Sirohi

I. From Lenin to Mao, adding Leon Trotsky with Indian Revolution

With the periodization of the Paris Commune by centralized party discipline and in fact the Trotskyist conception added, developments of What is to be Done? And even State and Revolution which then formalized the party and created a Soviet council argument which then was furthered by Permanent Revolution and Results and Prospects by Trotsky which then failed at many points – 1917, 1921 and even 1930 finally with Stalin collectivization and then of course had successes which lapsed in the site of Soviet with mass line and general fused strike of Petrograd Soviets arced with in fact insurrectional force in Trotsky's leadership as independent working class and CPSU leader, which then merged with Rosa Luxembourg's Insurrection in Berlin and even Gramscian war of position and manoeuvre in Italy till it all failed with the crisis of 1921.

Mao then develops Red Book following, Long March and then of course the Great Leap Forward becoming Cultural Revolution which was then the innovation of Cultural Revolution as in fact Indian Naxalbari and even Charu Mazumdar-Sanyal, and Paris 1968 Mai in French Maoism which is more intellectual in character, with Latin American Maoism which is fused praxis.

Mao developed the mass line format of politics in command which develops a political sequence at each point to resolve the contradiction of the base and superstructure with politics.

Trotsky is of course re-commenced with the Indian revolution which promotes the view of in fact philosophical leader and inter-tanglement with Cuba, Algeria and China even Israel as mass line conduct and even permanent protests as permanent revolution, which also orders postmodern economics to become a New Left part of Communist Parties.

Other sequences are singular and absolutely distinct – comparable to OP in France which is the normal idea in Badiouianism which actually and concretely is not politics, but intellectual politics – the concrete meaning is Foquismo in Cuba and FLN in Algeria. Which failed in economic policies and is finally inter-tangled with Indian philosophical leader – Sirohi. It is successful finally.

II. Freud, Lacan and Sirohi – the Fidelity and even recent bizarre speculations on Kabbalah as Formalization and Scientific Praxis which frees women to complete liberty and perfect cure – merged with Healthcare.

Freud is the fundamental event of psychoanalysis which then has periods of talking cure and unconscious as site of cure which then is developments of theoretical works for this science - which then becomes Lacan's elliptical formalization and mathemas, which though is insignificant in real practice - in the final analysis Sirohi extends these theories and re-vises them even with dialectics, healthcare and physician ideas which is like Piaget's emergent self therapy physician and Jewish Kabbalism merged with in fact spiritual cures and strong laws which make it Pure formalized science and is also practically effective with the matheme news - Quantoff and Deterior capitalism.

Finally one means that these are mathematical and even formalized disciplines of psychoanalysis which means a technical jargon finally which is also scientific, or in fact in the domain of love and feminism, an Act of science and philosophy.

III. All Disciplines and Genius expressed in Lectures forcing.

In fact a breakthrough on all grounds - Sirohi produces epistemological break as normal movement of transformative dialectics in daily discourse - it is finally not events, but ruptures which is the force of discovery. The recent being a discovery of ontic temporality and German Idealism in Heidegger.

IV. Diagonalizing in arguments then of fidelity to the main Event - mathematics after Cohen, with him, Anindya Bhattacharya and Shomit Sirohi

In fact mathematics then is a major science - a pure science which when modelled to arguments in philosophy and politics produces in fact a episteme and ontological claim which is superior to in fact the simple existence - when in fact read with History or all ruptures it fuses to create a simple existential life with physics and Soviet physics as well - finally mathematics is an Event which formalizes into a pure space of numerical progress which calculates the surreal group theory as in fact capturing geological scopes in current debate as surrealist sheafs - which means in fact - simple topoi-arrows of being-there which appear in significant ruptures and complexly means that a numerical progress is aligned to classification in sets of course - as extension of number to history or German Idealist confirmations.

V. Innovations and Red Book - the achievement of Mao again and by Sirohi - the intellectual support.

China is innovating to produce its true Communist syntax again for the Idea but also history and logic of its mass line history.

Sirohi produces works in Red Book which then is now intellectually and politically well formed or correct to live by – long live Naxalbari, long live Chinese Path.
